

GTS.TEAM. PRESENTS

LTVD Portal with SAP GTS integration

**Maintaining Long-Term Vendor Declarations
via Portal with full GTS Integration**

Benefits

Less Human Error

Minimize the possibility of human error thus decrease the risk of financial loss.

Paperless data handling

- Paper based LTVD data exchange became obsolete in the last 10 years.
- Other solutions like the interactive Adobe Form are quite expensive in licensing and usually require high implementation effort, as no default interface is provided within SAP GTS.
- In contrast to these, our product features full GTS integration in a cost-effective way.

Fast integration (Cloud/On Premise)

The GTS.Team LTVD Portal:

- comes out of the box with GTS interface
- ready to use HTML 5 Vendor Portal.

The solution can be used as a Cloud solution or on Premise.

Automatic/Semi Automatic operation

The returned LTVD data can be:

- maintained fully automatically in the system
- checked and approved first at Vendor/Material/Legal Regulation level.

Flexible pricing model

Cloud solution: only pay what you use per portal maintained LTVD.

GTS Interface

The solution comes with a ready to use GTS Interface. Maintain automatically all returned LTVDs, or process and accept them out of a worklist.

SECURE SAP GTS INTEGRATION

Security is a top-priority concern in our solution.
We use industry-standard data encryption
and ensure that only requests initiated from SAP GTS are
allowed and processed.
